

### Quick Guide

#### Overview

This guide provides instructions for reporting lines of therapy for myeloma patient cell therapy data entry in the ANZTCT Registry. The Myeloma Pre- and Post-Infusion forms contain a **Line of Therapy table**, which allows you to enter each line of therapy as a separate report form.

Each line of therapy should be entered as a separate **Disease Treatment form (instance)** and will be displayed in the table once each disease treatment form is saved.

#### What's new on the Patient Record

##### Patient Record Home Page

The screenshot displays the Patient Record Home Page interface. It features a grid of data collection instruments with status indicators (green, grey, red) and a '+ Add new' button. A red circle highlights the 'Disease Treatment' column header and the 'Myeloma Pre Infusion Treatment' and 'Myeloma Post Infusion Treatment' rows. Below the grid, the 'Repeating Instruments' section shows two tables: 'Myeloma Pre Infusion Treatment' with 7 instances and 'Myeloma Post Infusion Treatment' with 3 instances. A large red circle encompasses the entire 'Repeating Instruments' section.

Data Collection Instrument	Patient	Cell Therapy Infusion: 03-03-2024	Disease Treatment	Cell Therapy Follow Up Infusion/fu Period: 03-03-2024, 30 day

3	Systemic: 03-03-2024   Radiation:	●	

### Step-by-Step Instructions

#### Add a new line of therapy

- In the Myeloma Pre or Post infusion form go to the question: **Was any therapy given to treat disease in this reporting period?** When **YES** is selected, you will see the Pre or Post Infusion Therapy form table appear.

**3. PRE-INFUSION THERAPY**

Was any therapy given to treat disease in this reporting period?  Yes  No reset

Total number of lines of therapy given prior to cell therapy

Please report any disease treatment given on the Pre-Infusion Therapy form

**Pre Infusion Therapy Form**

Show 10 entries Search:

#	Line of therapy date	Systemic therapy start date	Drug regimen	Radiation start date	Best haematologic response to line of therapy	Disease relapsed/progressed following this line of therapy	Form Status

- Click **“+ Add New Disease Treatment”** at the bottom of the table

- A new blank Disease Treatment form will open, Enter the treatment details into the blank treatment form

Dialysis date  Today D-M-Y Save & Exit Form

Was imaging performed?  Save & Stay

**3. PRE-INFUSION THERAPY**

Was any therapy given to treat disease in this reporting period?  Yes  No reset

Total number of lines of therapy given prior to cell therapy

Please report any disease treatment given on the Pre-Infusion Therapy form

**Pre Infusion Therapy Form**

Show 10 entries Search:

#	Line of therapy date	Systemic therapy start date	Drug regimen	Radiation start date	Best haematologic response to line of therapy	Disease relapsed/progressed following this line of therapy	Form Status
1	04-04-2020	04-04-2020					
2	26-04-2025	26-04-2025					
3	30-07-2025	30-07-2025					
4	30-01-2026	30-01-2026					

Showing 1 to 4 of 4 entries Add New Disease Treatment

**Form Status**

Complete?  reset

**Lock this instrument?**

If locked, no user will be able to modify this instrument for this record until someone with Instrument Level Lock/Unlock privileges unlocks it.  Lock Save & Exit Form

Save & Stay Cancel

**NOTE:** Each form represents **one line of therapy** and once save will appear as a repeatable instrument under the Disease treatment event.

**Save the form**

- Click **Save & Exit Form**
- You will be returned to the Pre- or Post-Infusion form
- The new entry will appear in the table on the pre- or post-infusion form

Please report any disease treatment given on the Pre-Infusion Therapy form

**Pre Infusion Therapy Form**

Show 10 entries Search:

#	Line of therapy date	Systemic therapy start date	Drug regimen	Radiation start date	Best haematologic response to line of therapy	Disease relapsed/progressed following this line of therapy	Form Status
1	04-04-2020	04-04-2020	Rd (Lenalidomide, dexamethasone) (6)		Complete response (CR) (2)	Yes (1)	
2	26-04-2025	26-04-2025	Md (Melphalan, dexamethasone) (5)		No response (NR) / stable disease (SD) (5)	Yes (1)	
3	30-07-2025	30-07-2025	DdPo (Daratumumab, dexamethasone, Pomalidamide) (1)		Very good partial response (VGPR) (3)	Yes (1)	
4	30-01-2026	30-01-2026	VRd (Bortezomib, Lenalidomide, dexamethasone) (10)	14-02-2026	No response (NR) / stable disease (SD) (5)	Yes (1)	

Showing 1 to 4 of 4 entries

[Previous](#) **1** [Next](#)

[+ Add New Disease Treatment](#)

**NOTE:** The table is sorted by the Line of therapy date. This field / column is automatically calculated to determine the earliest therapy date (from either systemic or radiotherapy fields) and is used to ensure therapy lines are displayed in the table in correct chronological order, even if they are entered out of sequence.

**Editing an Existing Line of Therapy form**

You can edit an existing therapy record at any time by:

- Clicking the **instance number (#)** in the first column **or**
- Clicking the **Form Status icon** (e.g. green / red circle)

This will reopen the form for that specific line of therapy.

You can access line of therapy forms via:

- The **Line of therapy table** in the Myeloma Pre-Infusion and Myeloma Post Infusion Forms; or
- The **Disease Treatment** column in the patient record; or
- The **repeating instruments table** at the bottom of the patient record

(refer to the image of the Patient's Record Home Page at the beginning of this quick guide)

**Tips for Data Entry**

- Please enter the start date(s) for systemic and radiation therapy where possible; entering estimated dates if necessary;
- Check your entries after saving to confirm completeness (green status indicator);
- Use the table view to quickly review and navigate between lines of therapy.

**Need Help?**

If you have any questions or are unsure how to enter a line of therapy, please contact: [registry@anztct.org.au](mailto:registry@anztct.org.au)
